

## Installare WordPress su Bluehost in automatico

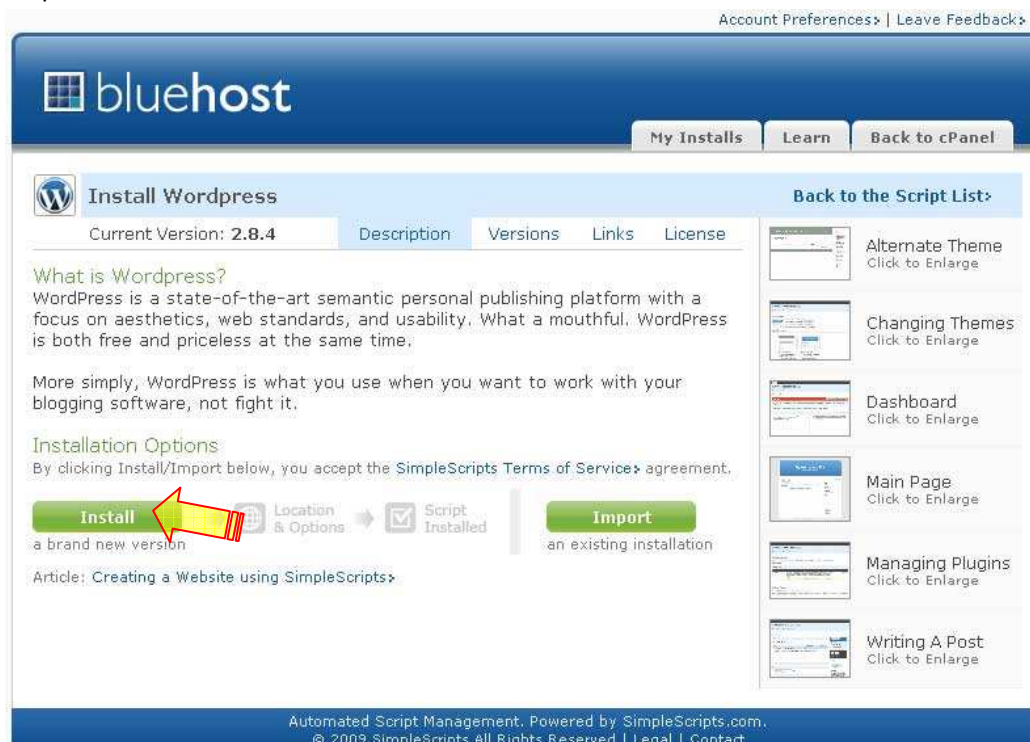

L'installazione di WordPress su [BlueHost](#) è resa veloce e agevole tramite il Simple Script che in automatico scarica al posto nostro il software, lo installa e lo configura.

### Come procedere: installazione passo passo

- Effettuare il login su [BlueHost](#) dal form in alto a destra e accedere al proprio pannello di controllo.
- Dal pannello di controllo nel gruppo "Software / Services" cliccare su "WordPress" per avviare l'installazione automatica.

- Si aprirà la finestra di installazione, denominata "Install WordPress", dove si procederà cliccando sul pulsante "Install".

- Allo "Step 1: Installation Preferences" selezionale la versione di WordPress da installare (si raccomanda si installare SEMPRE l'ultima versione), selezionare il sito dove si vuole installare il blog e la cartella che lo ospiterà e poi cliccare su "Complete". In questo caso WordPress vogliamo che sia installato su [www.sitino.com/wptest/](http://www.sitino.com/wptest/).

### Step 1: Installation Preferences

Which version of Wordpress would you like to install?  
It is highly recommended to choose the latest version to ensure your website's security and enable the latest features.

2.8.4 (Stable)

Where would you like Wordpress installed?  
http://www.sitino.com / wptest

Access URL: http://www.sitino.com/wptest  
Server Path: /home3/sitinoco/public\_html/wptest

### Step 2: Advanced Options

These options include administrative privileges, database configuration, and more. Changes are optional.  
[Click here to display >](#)

### Step 3: Legal Information

I have read the terms and conditions of the [GPLv2 license agreement >](#)

**Complete**

Automated Script Management. Powered by SimpleScripts.com.  
© 2009 SimpleScripts All Rights Reserved | Legal | Contact

- A questo punto [BlueHost](#) installerà in automatico WordPress e non ci resta che attendere il termine dell'installazione.

- Effettuare il login su WordPress e cominciate a bloggare!

The image shows the WordPress login interface. At the top left is the WordPress logo. To its right, the word "WORDPRESS" is written in a large, blue, serif font. Below the logo and text is a white login box with a light blue border. Inside the box, there are two input fields: "Username" with "admin" entered, and "Password" with a masked password of ten dots. Below the password field is a "Remember Me" checkbox and a blue "Log In" button. At the bottom left of the login box is a link that says "Lost your password?".

- Unico consiglio, come riporta anche WordPress nella schermata principale, è quello di modificare la password di accesso. Per farlo si può cliccare sul link in rosso proposto nella dashboard "Yes, take me to my profile page" Oppure cliccando su "admin" in alto a destra vicino al "Log Out".

The image shows a screenshot of the WordPress dashboard. At the top, there's a dark grey header with the WordPress logo, "My Blog", a "Visit Site" button, a "New Post" button, and the user's name "Howdy, admin" along with "Turbo" and "Log Out" options. Below the header is a sidebar with a "Dashboard" button and a list of menu items: "Posts", "Media", "Links", "Pages", and "Comments". The main content area has a "Dashboard" title and a red-bordered notice box that says: "Notice: you're using the auto-generated password for your account, Would you like to change it to something you'll remember easier? Yes, Take me to my profile page | No Thanks, Do not remind me again." Below the notice are two widgets: "Right Now" showing "At a Glance" with "1 Post" and "1 Comment", and "QuickPress" with a "Title" input field and "Upload/Insert" buttons.
